XM Satalite Radio is the best thing to happen to the transportation industry it provides much needed information from trafic and road conditions, to weather. it is very helpful being able to tune into a city taraffic and weather reaport before actually ariving in that city to possable avoid a bad situation. I think it is well worth the money for this service. So i'm am requesting you reject NAB's petition 04-160 and rule in favor of xm radio a much needed service in my opion.

Sincerlly,
Troy
